1. Course Description

This course provides a comprehensive overview of the Indian government structure through the lens of the Constitution of India. It begins with foundational concepts, including an introduction to the Constitution, the Parliament, federalism, local governance, the Supreme Court, and the Election Commission. Recognizing that students may come from diverse backgrounds, the course aims to equip them with essential knowledge to effectively engage in discussions on law and policy.

The course delves into law's role in shaping policy and governance in India. It examines how the judicial machinery, comprising courts and law enforcement agencies, has historically dispensed justice. The judiciary has played a pivotal role in enforcing constitutional rights, checking legislative and executive powers, and occasionally enacting laws when Parliament has faltered.

Students will gain insight into India's complex legal system and its social justice and governance implications.

2. Course Intended Learning Objectives (Aim)

Course Intended Learning Outcomes	Teaching and Learning Activities	Assessments/ Activities
Students will be familiar with fundamental institutions of governance in India	Interactive Lectures- Concept Mapping and discussions	Mock parliament or real-life case study analysis
Students will gain a firm understanding of the need for separation of powers and the political influence on the judicial system.
